

Beef Plug Pushers

Beef Throat Plug Pusher

The Adept Beef Plug Pusher rod is designed quick and effective insertion of the Adept Beef Plug and Adept Soluble Beef Plug. The specially shaped head seats the plug securely on the rod during insertion. The flexible rod follows the natural curve of the neck as it is pushed down into the oesophagus. Depth of the plug is operator and process variable. Adept recommends the plug be pushed up to the base of the paunch.

- Suitable for use on all types of cattle
- Lightweight and easy to clean
- Secure hold of plug during insertion

Product Code	1221-003 – Pusher – Beef Plug 1221-830 – Pusher – Soluble Beef Plug
Supplied	Single unit
Colour	White
Material	Plastic
Dimensions	Length: 1250mm
Plugs	1221-002 - Beef Throat Plug - Plastic 1221-017 - Beef Throat Plug - Soluble

Water Flushing Pusher

The Adept Beef Plug Pusher water-flushing rod is designed to make the insertion of an Adept plug quick and effective whilst at the same time delivering a water flush to wash ingesta present in the oesophagus (weasand), mouth cavity and nasal passage.

- Hand trigger controls water activation and flow
- Lightweight and easy to clean
- Ideal for Halal as the weasand is washed resulting in reduced risk of ingesta contamination when the Halal cut is performed
- Delivers a cleaner head resulting in higher yield due to less trimming
- Requires no additional infrastructure other than a standard water/hose line
