

Hog Throat Plug

Water Soluble Hog Throat Plug

The Adept soluble Hog Throat Plug is a world leading innovation to seal the oesophagus to prevent ingesta contamination of hog heads during processing.

The plug, combined with the insertion tool and automated dispensing system, are the result of extensive research and development. The plug is inserted into the oesophagus through the mouth of the hanging hog post stunning and bleeding using the inserter tool. The plug seals the oesophagus, preventing ingesta material leaking into the mouth causing contamination.

The plug is manufactured from Adsol, Adept's proprietary food grade, water soluble material that retains its structural integrity long enough to be effective, before dissolving when exposed to heat and moisture.

- Reduce head loss due to ingesta contamination.
- The inserted plug forms a secure seal inside the oesophagus preventing ingesta leakage during processing.
- Adsol is Adept's proprietary water-soluble technology, formulated from food grade components.
- No requirement to recover used plugs.
- Environmentally friendly and safe solution.

Product Code	1390-001 – Hog Throat Plug (Soluble)
Supplied	2500 plugs per carton
Colour	Natural
Carton Dimensions	Length: 250mm Width: 250mm Height: 210mm Weight: 8.3KG
Compatible Inserter	1390-810 – Hog Plug Inserter
Compatible Dispenser	1390-900 – Hog Plug Dispenser
